PERSPECTIVES UNDER UNCERTAINTIES AND RISK IN WIND FARMS INVESTMENTS BASED ON OMEGA-LCOE APPROACH: AN ANALYSIS IN SÃO PAULO STATE, BRAZIL

Written G. Aquila, W. T. Nakamura, P. Rotella Junior, L. C. S. Rocha, E. O. Pamplona

This present study proposes the stochastic approach Omega-LCOE to compare a Levelized Cost of Electricity (LCOE) between different locations. To validate the proposed approach, an investigation has been conducted to compare the wind energy LCOE of the 63 main cities in São Paulo state (Brazil) to the world LCOE average. Therefore, the Omega value estimated by a ratio of potential gains (costs reductions) and losses (costs inflations) in relation to a benchmarking (world LCOE average) is calculated for each city, based on 10,000 values of LCOE obtained by Simulation of Monte Carlo. DO PRESIDENT TRUMP'S TWEETS AFFECT FINANCIAL MARKETS?

Written by Peder Gjerstad, Peter Filip Meyn, Peter Molnár, Thomas Dowling Næss

Frequent tweets of the former president of the United States, Donald Trump, provide a unique opportunity to study how financial markets respond to his statements. To do this, we utilize a precise timestamp of each tweet together with high-frequency financial data. We start by analyzing the impact of tweets in general, irrespective of their content. We find that tweets by President Trump are followed by increased uncertainty, increased trading and a decline in the US stock market. [Read more](#)

PERFORMANCE MEASUREMENT IN A TRANSITIONAL ECONOMY: UNFOLDING A CASE OF KPIs

Written by Shahzad Uddin, Boris Popesko, Šárka Papadaki, Jaroslav Wagner

The purpose of this paper aims to make contributions to the debate on "performance measurement in practice" focussing on how organisational participants respond to the "new regime" of key performance indicators (KPIs) and whether KPIs materialise as intended in a transitional economy. Design/methodology/approach Inspired by the epistemological instruction of Schatzki's practice theory, this paper draws on qualitative data collected through face-to-face interviews, observations and documentary analysis of a single organisation. THE EFFECT OF FINANCIAL LEVERAGE ON OPERATING PERFORMANCE: EVIDENCE FROM THE CZECH REPUBLIC

Written by Z. Toušek, B. Malinská, M. Prokop, D. Procházka

Joint research paper of the authors from the FFA and Česká spořitelna, the general partner of the University. The authors combine the theoretical background with the knowledge of business practices and contribute, thus, to the current debate concerning the patterns of corporate financing in a small open economy. NEW BOOK

PROFIT SHIFTING AND TAX BASE EROSION

Written by D. Nerudová, J. Pavel, V. Solilová, M. Dobranchi, J. Tepperová, L. Vítěk

The book explains how profit shifting and tax base erosion can be measured from the micro and macro perspective. Also, it includes a chapter on economic and tax policies in the 21st century and on tools to help eliminate profit shifting and tax base erosion. Furthermore, the book discusses the internationally current issues of corporate tax reforms and the possibilities of reducing international tax planning and tax evasion. After reading the book, readers should understand how to achieve fairer corporate taxation. [Read more](#)
